

Agion Active XL  
Advanced Odor Control

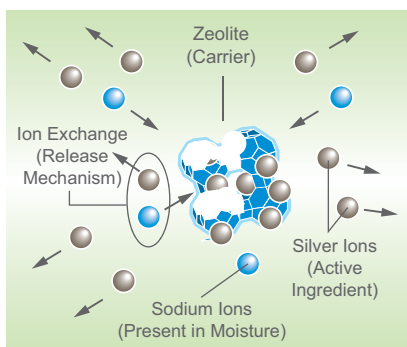

Agion Active XL is a next-generation, dual-function odor control. Building on the innovations of the first Agion Active technology, Agion Active XL is designed to provide long-lasting odor control.

While other odor control technologies rely on laundering to regenerate, Agion Active XL self-regenerates. This provides optimal performance for some of the most challenging applications. Protect and differentiate your product with Agion Active XL odor control.

## Benefits of Agion Active XL

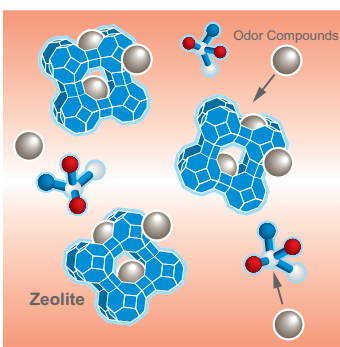

- Self-regenerates between launderings
- Dual-functionality: Antimicrobial and Odor Adsorber
- Triple-action technology: Attracts, Adsorbs, and Degrades body odor compounds
- Easily integrated into the finishing process
- Durable up to 50 HL

### Dual-Function Technology

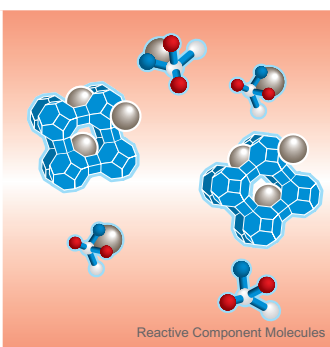

Agion Antimicrobial

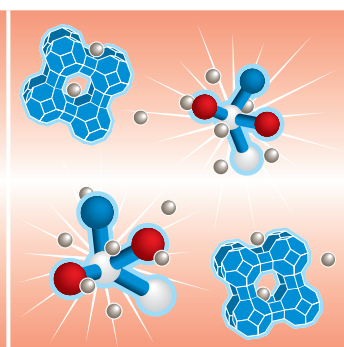

#### Stage 1 - Attraction

#### Stage 2 - Adsorption

#### Stage 3 - Degradation

Lava XL

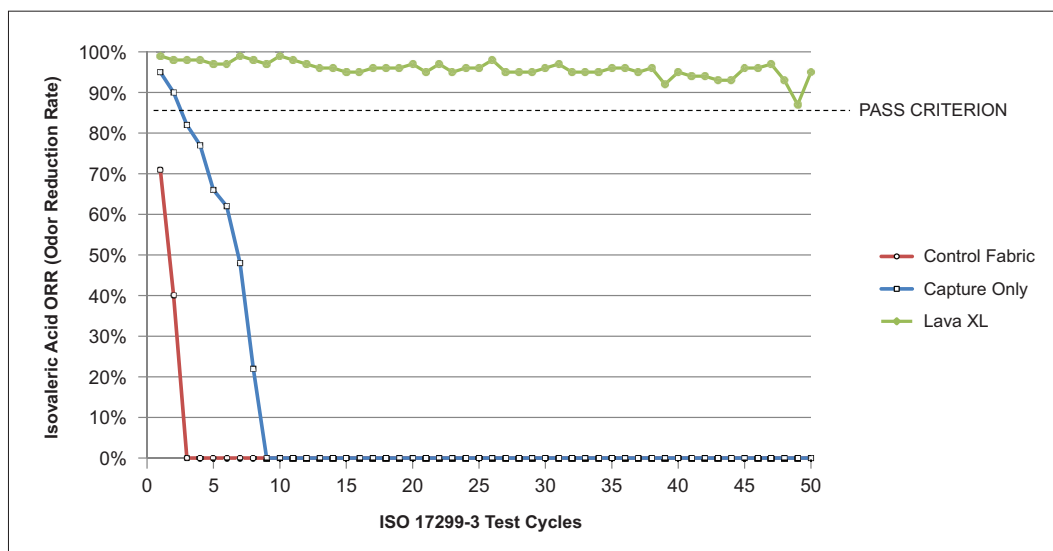

Agion Active XL  
Advanced Odor Control

## Unprecedented Durability

Lava XL, a key component to Agion Active XL, was exposed to 50 consecutive doses of Isovaleric Acid without any laundering. As shown below, Lava XL not only outlasted first generation “capture only” technology, it passed the ISO 17299-3 criteria through all 50 doses!

If your product is in need of a technology that adds performance, value and differentiation then Agion Active XL is the product for you. Agion Active XL is designed to provide advanced odor control to perform in products for the active consumer to sporting gear – and beyond.
