

It's Time to Re-Evaluate Your Antimicrobial Tech Provider

2020 has brought many changes and new challenges including higher expectations for antimicrobial performance and support. Here's a checklist to re-evaluate your current antimicrobial technology provider.

- ☐ 1. How efficient is the supplier's antimicrobial technology in reducing microbes?
- ☐ 2. How will the antimicrobial technology supplier assist me in the manufacturing process?
- ☐ 3. What precautions does the antimicrobial technology supplier take to ensure my products will be safe for consumers to use?
- ☐ 4. Does the antimicrobial technology supplier have a proven track record and reputation?
- ☐ 5. Is our current antimicrobial registered with the EPA?
- ☐ 6. Is the provider familiar w/ the rules and regulations for being EPA compliant with marketing claims?
- ☐ 7. Has the current supplier provided proof of registrations such as EPA, bluesign, etc?
- ☐ 8. If they are a non-US based corporation, is the provider familiar with how regulations work across countries?
- ☐ 9. Do you rely on your supplier for marketing claims or is it done internally?
